

### REMARKS

Claims 64, 72 and 88 are amended. Claims 64-105 remain in the application for consideration.

The claims are amended to change "positioning" to "providing". No new matter is added thereby. Clearly, the semiconductor substrate being processed must be provided within the chamber for the stated subsequent processing acts to occur, and accordingly, no new matter is added thereby. Entry of these amendments is requested.

A new reference is cited which was cited in the priority patent application to this application. Review thereof, and initially of the accompanying Form PTO-1449 is requested.

This application is believed to be in immediate condition for allowance, and action to that end is requested.

Respectfully submitted,

Dated: 1-23-06
